EDUCATION

BBS College of Engineering and Technology Shantipuram Prayagraj
Oct'21 - June'25

Bachelor of Technology , CSE   (SEM:8th)   *Prayagraj, UttarPradesh*

ACADEMIC PROJECTS

- **Currency Converter Source - code**
  - A currency converter is a tool that allows users to convert one currency to another based on current exchange rates. This project can be developed as a web application, mobile app, or even a command-line tool.
  - Use a currency exchange rate API (like Open Exchange Rates, CurrencyLayer, or ExchangeRate-API).
  - HTML, CSS, JavaScript

- **Weather App Source - Code**
  - The goal of the weather app is to provide users with real-time weather data for any location they search for. This can be as simple as showing the current temperature and weather conditions or more complex by adding multi-day forecasts, geolocation, and other weather-related details..
  - Utilized HTML/CSS/JAVASCRIPT to create a scalable and responsive application.

TECHNICAL SKILLS

- **Languages**   : C, Java, Javascript
- **Technologies**   : React.js, HTML/CSS, Libraries
- **Tools**   : Git, Github
